

Heal with laser!

SAFE LASER

Research - Development - Manufacturing

Safe Laser in hospitals

Safe Laser for home use

„In our institution, we have been using Safe Laser devices for 4 years and we have been curing thousands of patients. The healing process has been significantly shortened during the treatments. Chronic complaints have also improved, which we could influence hardly or we have not been able to influence so far. In many cases, the amount of medication is significantly reduced or even abandoned.”

Prof. Dr. Sándor Sandra
Head of the department
State Medical Center
(Rheumatology and Physiotherapy)

„After my knee surgery following a skiing accident, Safe Laser accelerated the healing process and helped in the regenerating processes after trainings. I am very grateful, it has helped me a lot and I will continue to benefit from using it!”

Edit Miklós
Alpine Skier World Cup 3rd & Olympics 7th place

„During my 30-year career, Safe Laser has brought the most spectacular improvement for my shoulder problems.”

Dr. Gergely Kiss
Three-time Olympic champion water polo player

„I suffered a horse accident 4 days before the World Cup. In a collision, I crushed my shin. Thanks to Safe Laser, my injury has become totally painless in a couple of days and nothing has prevented my World Cup victory.”

Sarolta Kovács
World Champion Pentathlete

"I have many patients who suffer from tinnitus or hearing loss, and a high proportion of them reported improvement or complete recovery thanks to the laser treatments. In addition, I also recommend Safe Laser in the case of complaints regarding the temporomandibular joint or upper respiratory disease, particularly in clinical pictures consequent on nasal obstruction..."

Dr. Györgyi Fülöp
Adjunct
Bajcsy-Zsillinszky Hospital
(Otolaryngology)

More information:

SAFE LASER

A new device for effective healing
– for medical and home use

Effects of soft-laser lights:

- Accelerates and triggers the healing processes of the body (biostimulation)
- Pain relief
- Inflammation and swelling reduction
- Improved blood- and lymph circulation
- Stimulates the regeneration of damaged nerves

Official medical device
Certificate number: 144446-13-08-16

Treatable diseases and problems with Safe Laser

Why is Safe Laser so effective for many diseases?

Musculoskeletal disorders

Pain relief, joint-, muscle-, tendon-inflammations, rheumatic pains, arthrosis

Sport injuries

Muscle strain, contusion, hematoma, bone fracture, muscle and ligament injuries

Skin problems

Eczema, skin inflammations, herpes simplex, herpes, bruises, cuts, burn and freeze injuries

Diabetes

Heals ulcerated wounds

Ear complaints

Inflammation, pain, itchiness, tinnitus

Allergy, asthma, hay fever, respiratory inflammations

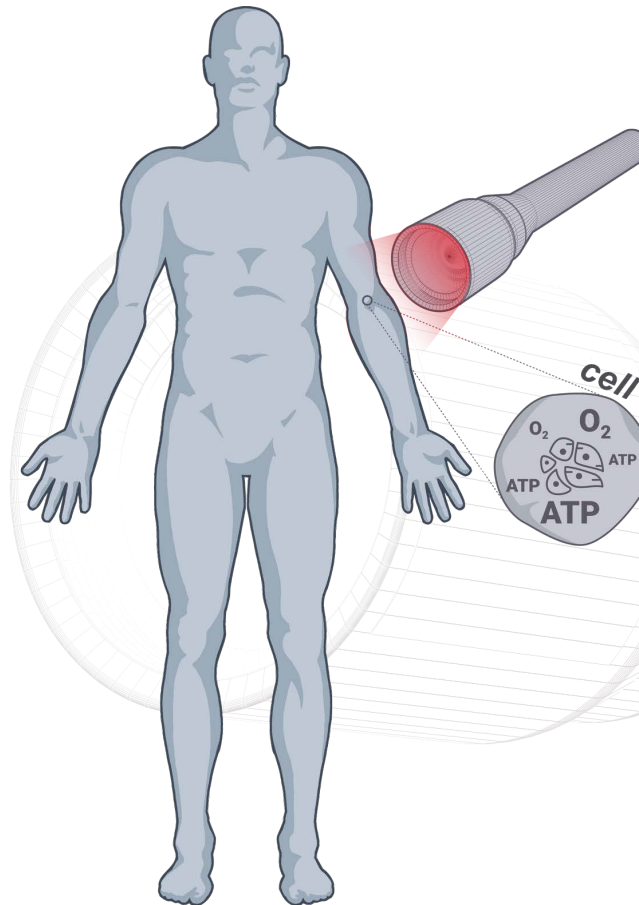

Relieves and eliminates symptoms

Dental problems

Toothache, inflammation, atrophy and bleeding of the gums, oral mucosal injuries

Cosmetic problems

Pimples, inflammations

Because in case of diseases or injuries some **operational disturbances occur in the cells.**

The **laser light** induces the photosensitive molecules of our cells, thereby improving the production of cellular respiration and cell energy (ATP).

The activity of the cells (more then one area) **is more efficient.**

Faster regeneration, the healing time of the diseases is shortened!

Benefits of Safe Laser treatment

SAFE LASER

- 1 It does not only relieve the symptoms of the disease, but it also eliminates the cause in many cases
- 2 It can be combined with any other therapy
- 3 No known harmful side effects
- 4 Versatile use, fast treatment time
- 5 Extremely effective
- 6 Painless and safe use
